

MAD SCIENCE STEM ENRICHMENT

AFTERSCHOOL PROGRAMS

-Getting Kids Back To Curiosity, Collaboration, & Creativity-

Mad Lab Medley

Join us in discovering the many ways science helps us explore our world! "Mad Lab Medley" is full of exciting sampler "courses" aimed to meet the varied interests and imaginations of today's young minds! Unravel the mystery of chemistry by watching crystals form in a water glass. Experiment with hovercrafts, foaming concoctions, and Technicolor Blenders. Grab your ticket to the stars with your own pocket sky map. Walk in the shoes of detectives and examine fingerprints, mystery powders, and ink samples. Learn about how different animals adapt to their environments, and get bug-eyed with Insect-A-Vision take-homes sure to challenge your perspective. From telescope to microscope and everything in between, this class will leave you inspired by the wonders of science!
