

## 5/6 Math Week of April 22

### Math Test on Wednesday April 24.

#### 5th Math

**Monday:** Lesson 90 Reducing Fractions, part 2 - Students will reduce fractions to lowest terms by dividing both terms by common factors or by the greatest common factor. Students will also write percentages as reduced fractions.

**Tuesday:** Practice Test

**Wednesday:** Cumulative Test 17 and Power-Up Test

**Thursday:** NWEA Math

**Friday:** Investigation 9 Performing Probability Experiments - Students will perform probability experiments using dice and record the results in a frequency table.

#### 6th Math

**Monday:** Lesson 90 Measuring Turns - Students will identify and describe turns measured in degrees, and solve problems involving turns.

**Tuesday:** Practice Test

**Wednesday:** Cumulative Test 17 and Power-Up Test

**Thursday:** NWEA Math

**Friday:** Investigation 9 Experimental Probability - Students will estimate the probability of an event from data gathered by performing a probability experiment and present data in a relative frequency table.
